The screenshot displays an Xshell terminal window with multiple tabs. The active tab shows a series of debug logs from a system, including jitter counts, system times, and error messages such as "MAX SR triggered!", "Rrc Switch node type to UE", and "adrv9025_init:2613 has failed.". Below the logs, there are network-related messages indicating a connection to 192.168.2.98, followed by a disconnection at 22:31:17. The terminal interface includes standard Xshell toolbars and a taskbar at the bottom showing various application icons.
